

## **Proposed Westerfield Quarry**

**You may have heard about the proposals for a new quarry in Westerfield near Ipswich extracting 1,700,000 tonnes of sand and gravel over 16 years.**

**In fact it is more than a quarry, it is also to be a major industrial processing site with crushed concrete and other materials (50,000 tonnes/year) being imported to the site for processing from outside the area.**

**It is anticipated that there will be 252 trucks and 60 ancillary light vehicles traveling from the site every day! We think this frequency of vehicle activity will be primarily for the ongoing construction of Sizewell C. There are alternative sources of supply for SZC construction, i.e. via the proposed pier, rather than our inadequate road network.**

**You may think this does not affect you but think again; these trucks will be heading through many of our villages and although we do not yet know which routes, there are no major lorry routes near the quarry site and it is possible that the B1078 and B1079 and A12 might all be adversely affected.**

**This proposal is a real prospect and is likely to happen quickly.**

**The Campaign to Stop The Quarry (STQ) urgently needs your help. If you think you can help in any way please visit their website**
